December 19, 2005

Information Technology Director, Denise C. Potvin, is excited to announce the publication of a new website for the Town Of Lincoln.

The website, www.LincolnRI.org, has been designed to be feature-rich and easy to use for those who live and work in Lincoln – or for those that simply want to know more about the town. Informative pages explain the function of the various departments, with most pages providing time-saving forms and documents. Meeting agendas and minutes that are accessed directly through the Secretary of State’s Office, a Town Calendar that displays meeting schedules and other important dates, links to other related websites, and a page showing the rich history of the Town of Lincoln are among the many other features of this new website.

Town Administrator Sue P. Sheppard stated, “We knew that there was so much more that a website could offer to our residents, business owners, and others with an interest in the Town of Lincoln. We wanted a renewed presence. It had to be something that we could be proud to direct people to as a useful tool, as well as be the face of our wonderful town.”

Denise Potvin added, “Although I am very pleased with the result of all of the hard work that went into making this such a success – not only my own efforts, but the efforts of each of the department heads and Sue – I also want to impress that this is not an end of a road. A good and useful website is a dynamic thing, and I know I will see it continue to change to meet the needs of our town on a regular basis. It will be a place to come back to time and time again.”

Questions and comments may be submitted through the Contact Us section of the website. Inquiries related to a particular department should be directed specifically to that department, but general questions about the website may be sent to the webmaster.
