## **Mandatory Odd/Even Water Restrictions**

The Lincoln Water Commission is now in the second stage of a 'water watch'. Water use has now reached the point where reserves are being tapped to meet daily demand.

The Commission is **requiring** that all outdoor water use be limited to every other day, according to the Odd/Even method. If your address is an odd number, outdoor water use will be on odd numbered days. If your address is an even number, outdoor water use will be on even numbered days.

The Commission is continuously monitoring the situation and will notify consumers when restrictions are no longer necessary.

Thank you for your help.
